DETAILED ACTION

Claim Objections

1. Claim 15 is objected to because of the following informalities: there is no ending punctuation (period"."). Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The alternative language in claims 11-13 is confusing. The functions that are performed in these claims appears to be associated with either one of the first actuator OR the second actuator. The current language "one of the first actuator AND second actuator" appears to be in error since OR seems to be the proper form.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3651

5. Claims 1 and 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Rysti

(US Pat. 4,144,976).

See the attached marked up copy of Rysti Drawing Figure 1 depicting the claimed

features.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the

claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various

claims was commonly owned at the time any inventions covered therein were made absent any

evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out

the inventor and invention dates of each claim that was not commonly owned at the time a later

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c)

and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 3-5, 7, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Rysti.

RE claims 3-5, Rysti teach the claimed invention as outlined above, except for the type of material in which his support bracket is made. Rysti is silent on the material for his support bracket. It would have been an obvious matter of design choice as to the type of material being used to make a part of the invention based on specific design considerations which are particular to the invention at hand. The mere claiming of a particular known material does not provide a patentable departure from that of Rysti, furthermore, the applicant's claims do not state and intended purpose or particular reason for using this specific material.

RE claims 7 and 8, Rysti teach the claimed invention as outlined above, except for the shape of his support bracket ends. Rysti utilizes an L-shaped bracket for his invention. Rysti fails to teach the particular claimed shape (horned, wedged shaped) of the applicant's. It would have been an obvious matter of design choice as to the shape of a particular element based on design considerations of the device at hand, such as, angle of the bracket, the movement of the bracket and the necessary shape to keep the sticker on the bracket during movement. The mere claiming of a shape of a element does not provide a patentable departure from that bracket of Rysti.

Allowable Subject Matter

9. Claims 2,6,9,10,14, and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/676,245 Page 5

Art Unit: 3651

Claims 11-13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

- 10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas A Hess whose telephone number is 703-308-3428. The examiner can normally be reached on M-Thurs 5:30 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Ellis can be reached on 703-308-2560. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
